

Cosmetic Academic Surgery

DO YOU LACK ACADEMIC CONFIDENCE? ARE YOUR GRADES SAGGING? IS YOUR THESIS TITLE EMBARRASSINGLY SHORT? DOES YOUR PUBLICATION RECORD NEED A LIFT?

The Academic Hospital of the University of Tassel Town can help. Our Department of Bombastic and Deconstructive Surgery has many years' experience. Our highly trained minions – spin-doctors who are graduates of some of the world's finest bovine turd factories – have demonstrated ability in enhancing grades, enlarging puny research proposals, removing unsightly marks of stupidity, resurfacing CVs, and much more.

Make an appointment today to find out more about what we can offer you. Our services include:

College-En. Injection

College entrance – 'College-En' as doctors call it – is the first step to a higher education. If you have academic aspirations, or at least pretensions, and you lack what it takes to get in, you may be a candidate for a College-En injection.

Grade enhancement

How is a young graduate to be noticed if her grades are too small? Will she be passed over by prospective employers in favour of graduates of other, better-endowed, universities? With grade enhancement we help your academic transcript have the fuller figure that gives you the edge over those suckers labouring at quality higher education institutions where more modest natural grades are the norm. Grade enhancement isn't only for weaker students. Even the strongest students can benefit from enhancement. In a procedure called Best Enhancement, we turn ordinary First class passes – 75s – into nicely rounded 80s or 90s.

Dummy Tuck

If you're intellectually flabby, we

have just the solution. Using state of the art analytic scalpels, we cut confusion. After this procedure you'll sound like a lean, mean, thinking machine. Your days as a dummy are done.

Bimboplasty

Not everybody can benefit from a dummy tuck. If your stupidity is of proboscal proportions, you may want to consider bimboplasty. In this procedure we re-sculpt your academic visage to help you pass as an intellectual. Be warned though: with your new appearance of intelligence you'll hook that brainy mate you meet. You'll have lots of explaining to do when, years later, your bimbo-genes show up in your offspring.

Diplomasuction

Need more letters after your name? Can't be bothered to study for a full degree? Try diplomasuction! Via this procedure, your name attracts high-sounding collections of letters without having to study for full degrees. Our Diploma in Religion is especially popular: you earn those ever-popular letters "DR". Instead of six years of medical school, you spend only two evenings a week for a semester. Talk about a bargain!

Titular enlargement

Is your partner dissatisfied with your small thesis title? When your fellow postgraduate students ask what your thesis title is, do you feel like less of a man because you can answer in a single breath? Titular enlargement is what you need. Our post-modern wordgeons can work wonders. They'll add "class" and "gender" and ensure that both are "contextually situated". They never underestimate the value of a subtitle, in which the sexy phrase "towards a post-colonial" not only adds four words, but also that enviable hyphen. What a rush!

Titular enhancement

Thesis titles are but a means to personal ones. Want an upgrade to "Dr"? Once the preserve of an elite, the doctoral degree is now distinctly mass market. Tassel Town University is intent on producing more Ph(ony) D(ector)s. Our PhDs come cheap, which is why this procedure is sometimes also known as "Doctoral Reduction".

Academabrasion

Does your CV have a pallid hue because many years have passed since you last published? Is it pock-marked with poor quality publica-

tions in non-accredited journals? Our revolutionary new academabrasion process will put the vitae back into your Curriculum V. Different from the face-lift, this is the academic face save. We help you add publications in accredited journals. We do this by founding dozens of local small circulation journals to which you can send your sub-par work. Nominally peer-reviewed, they are actually in-house jobs, edited by former clients – oops, graduates – of ours, now based at the Technical University of Pretension in Mamparalanga.

Here removal

No self-respecting professor should be seen on his own campus, for greatness is measured by one's activities elsewhere. Become a globe-trotter with our scientifically innovative "Here Removal" procedure. We take you away from here and send you there. Leave your academic cave, travel the world and shed your reputation as a dasypygal academic troglodyte.

Professorial augmentation

For the professor who has everything, an upgrade is just what the doctor ordered. By means of professorial augmentation we can transform you into a Distinguished Professor or a Herr Doctor Überprofessor.

Why be modest just because you have much to be modest about? Be all you can appear to be!
