

## **JUNIOR RESEARCH FELLOW: INFRASTRUCTURE STUDIES** (3-year contract)

### **ENVIRONMENTAL HUMANITIES SOUTH**

### **FACULTY OF HUMANITIES**

The University of Cape Town's Environmental Humanities South (EHS) invites applications for a three-year Junior Research Fellow post funded jointly by University of Cape Town and the CzASE Studies - Critical Zones Africa South & East research programme funded by Science For Africa Foundation under the DELTASII Africa Awards.

The Junior Research Fellow post will be awarded as a three-year appointment at the University of Cape Town, with a further 9 months renewable on condition of satisfactory progress and available funding. The project will end on 30 September 2027.

The Junior Research Fellow will be responsible for developing Infrastructure Studies that take into account the material effects of social relations and infrastructure/technologies in the critical zone, the thin zone of habitability at any point on the Earth's surface where life is made possible by the flows and relations from aquifer to cloud.

We are looking for an energetic, generous, collaborative and collegial researcher who is committed to transdisciplinary research and comfortable developing participatory research designs and questions in collaboration with affected communities.

The appointee will be part of an active and lively team committed to developing an African environmentalism in a project spanning six African countries, with partners at the universities of Addis Ababa, Dar es Salaam, Zimbabwe, Cape Town, Eduardo Mondlane and the Lilongwe University of Agriculture and Natural Resources. The appointee should be able to work with minimal to modest levels of supervision, and will have the opportunity to develop a lab of Masters and/or PhD students to be co-supervised with partner university leads on their research sites, and will be expected to assist in day to day academic activities and management tasks in a fast-growing and relatively new research team.

The appointee will be required to be based full-time in the EHS offices at UCT, and will work closely with Dr Nikiwe Solomon and Prof Lesley Green at EHS, UCT (the Award PI).

#### **Requirements:**

- A PhD in the social sciences or cognate discipline (such as planning or industrial ecology) with demonstrated interest in science and technology studies and infrastructure studies; an interest in Critical Zone scholarship, and a familiarity with African post-colonial and decolonial research.
- A minimum of 2 years and a maximum of 5 years relevant postdoctoral experience. As the intention is to provide opportunity for researchers who have completed a postdoctoral fellowship but are not yet independent PIs in their own right, past experience as a postdoctoral fellow is expected. In its absence, a motivation will be considered.
- Evidence of transdisciplinary research combining social and applied sciences with demonstrated capacity to engage with infrastructure politics.
- Field research experience involving collaborative research designs.
- Ability to travel.

#### **Advantages:**

- Teaching experience in tertiary education.
- Experience in dissertation supervision.
- Familiarity with urban and regional design, and/or infrastructure politics in Africa.
- Fluency in an African language spoken in Southern and/or East Africa.
- Background in urban or regional planning or related fields in science studies with a specialisation in infrastructure studies/politics and policy.
- Experience/training in engineering.
- Publications in a cognate field.

#### **Responsibilities:**

- The appointed fellow will co-lead a research hub that advances the dialogue of infrastructure studies with critical zone studies within the wider CzASE team.
- Advise CzASE social scientists on the integration of their research with urban and regional planning, and/or infrastructure studies.
- Participate in collaborative research and co-authorship on the CzASE project with African university partners and co-supervise one Masters and/or PhD student per partner research project.
- Assist in the identification of research funding opportunities, and co-author research grants applications in the first year of appointment, that includes the cost of their annual salary (in which case UCT funds will be kept in reserve for the Principal Investigator (PI) to consider continuation when the external grant is concluded).
- Participate in undergraduate and postgraduate teaching and postgraduate (co-)supervision, provided it advances the independence of the Fellow and provided this is not at the detriment of the research project.
- Be present in EHS offices daily during core work hours. Flexible hours are subject to agreement.
- Assist with the organisation and running of networking events for EHS and CzASE.
- Publish research outputs in accredited journals and / or scholarly books. SFA expects Fellows to lead-author at least 1 peer-reviewed paper per year, and co-author at least a further 1 paper per year, including with graduate students.
- Conduct 1 international university visit or 1 conference presentation per year, with at least 1 international conference presentation during the tenure.
- Adhere to the University of Cape Town's research policies.
- Adhere to the Science For Africa research and publication policies.

- An annual mid-year and end-of-year progress report will be required from each awardee, to be submitted to the PI and the UCT Research Office.

The annual remuneration package, including benefits, is between R544 062 and R700 000 (post is funded from research funding) depending on qualifications and experience.

The successful incumbent should be available to take up the position after 1 November 2023 and by 1 January 2024.

Enquiries should be addressed to Dr Nikiwe Solomon at [Nikiwe.solomon@uct.ac.za](mailto:Nikiwe.solomon@uct.ac.za) with the subject head 'JRF PLANNING & INFRASTRUCTURE'.

**To apply**, please e-mail the below documents in a **single pdf file** to Ms Tracy Moore at [recruitment05@uct.ac.za](mailto:recruitment05@uct.ac.za)

- UCT Application Form (download at <http://forms.uct.ac.za/hr201.doc>)
- Motivation letter that speaks to the specific requirements of the position
- A maximum of 3 publications/writing samples
- Curriculum Vitae (CV)

Please ensure the title and reference number are indicated in the subject line.

An application which does not comply with the above requirements will be regarded as incomplete.

Only shortlisted candidates will be contacted and may be required to undergo an assessment.

**Telephone:** 021 650 5405
